PIRE International Research Internship 2013

The UNM PIRE International Research Internship provides an opportunity for students, faculty and post-docs to conduct cutting-edge research at our European site partners in Germany, Denmark, Finland, and the Netherlands.

The Research Internship consists of the following:

- 2-6 month research internship at one of our international research sites
- Round-trip airfare and housing arrangements paid for by the PIRE program
- Field trips to companies or national labs
- Monthly stipend to cover educational, local travel and meal expenses
- Option to attend the PIRE Summer School, or a research conference during your stay at the EU site

Must complete all travel by August 31, 2013 (the end date for our NSF PIRE grant)

The UNM PIRE Program will cover the following expenses:

- Travel Expenses
- Lodging Expenses
- Subsistence Stipend to cover out of pocket meal and travel expenses
- For undergraduate students, there will also be a salary commensurate with an REU program

Eligibility Requirements

- Must be nominated by your faculty advisor
- NSF rules for the PIRE program restrict support to US citizens or permanent residents, students who do not meet this criterion must seek other funding.
- All travel must be completed by August 31, 2013.
